Start Your Project Out Right with a Great Foundation by Using Anvil Grip-Tite High Adhesion Concrete Primer!

Anvil #1750 High Performance Water Borne Grip-Tite Bonding Primer applied directly to clean, porous concrete overcomes the problem of improperly prepared surfaces prior to painting or staining. Grip-Tite penetrates into the concrete and improves the adhesion of the topcoat. Grip-Tite forms a surface that improves the workability and durability of the topcoat. #1750 Grip-Tite is a specially formulated bonding primer that can be used to improve the bonding whenever a masonry type coating, such as Anvil #1700 High Performance Epoxy Show Coat Concrete & Garage Floor Paint, Anvil #1500 Water Reducible Acrylic Solid Color Concrete Stain or Anvil #2300 Semi-Transparent Concrete Stain is to be applied. Anvil #1750 High Performance Water Borne Grip-Tite Bonding Primer can be used interior/exterior, painted or unpainted, vertical/horizontal concrete, masonry, stucco, CMU block and porous brick surfaces. Also great for use as a touch up primer where other surface coatings have failed.

High Performance Epoxy Show Coat Concrete & Garage Floor Coating

Anvil #1700 High Performance Epoxy Show Coat Concrete & Garage Floor Paint combines the durability of epoxy coatings with the ease of water cleanup in a single component coating. Anvil #1700 High Performance Epoxy Show Coat Concrete & Garage Floor Paint when applied to a properly prepared surface is highly resistant to the effects of hot automobile tires and delivers a solid color satin finish and can be top coated with Anvil #2350 'Wet Look' Sealer to add a gloss finish to the surface. Anvil #1700 High Performance Epoxy Show Coat Concrete & Garage Floor Paint is formulated for use on interior and exterior painted or unpainted concrete surfaces such as garage floors, driveways, patios, walkways, decks, basements, shop floors, pool decks and sidewalks. Also, Anvil #1700 High Performance Epoxy Show Coat Concrete & Garage Floor Paint is formulated to be highly resistant to automotive chemicals, oil, grease and gasoline. Its durable acrylic/epoxy formula also resists fading, scuffing, cracking, peeling and blistering.

Epoxy Show Coat Concrete & Garage Floor Coatings

Siliconized Acrylic Concrete Sealer

Beautify and protect your coated or uncoated concrete with the Anvil #1500 Series!

Anvil #1500 Series Concrete Stain is specially formulated for use on painted and unpainted concrete and asphalt surfaces such as driveways, garage floors, patios, walkways, decks and sidewalks. It may also be used on masonry walls, concrete roofs and pool decks. You can even park your car on it! When applied to a properly prepared surface Anvil #1500 won't lift off even with hot automobile tires. The satin surface resists damage from many types of household chemicals, motor oil, transmission fluid, gasoline and more. Because Anvil 1500 is water based, there are no noticeable fumes or odors and you have the convenience of easy cleanup with soap and water.

Use on:

- Concrete or Asphalt Driveways
- Porches, Patios and Pool Decks
- Concrete and Cinder Block
- Garage Floors
- Walkways and Steps
- Concrete Roofs

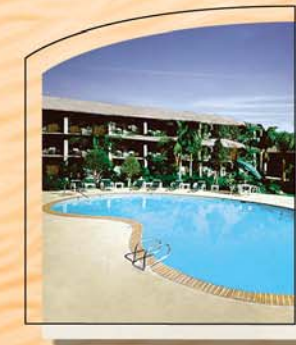

For A Great Seal and Protection of Unsealed Concrete, use Anvil 1900 Series!

Anvil #1900 Siliconized Acrylic Concrete Sealer penetrates deeply into the concrete surface to repel water and long lasting color retention. Won't peel or chip like paint. You get a attractive, durable finish that can handle high traffic or heavy equipment - such as automobiles and heavy foot traffic. Anvil #1900 Series is also ideal for use on concrete walls where a long lasting, decorative finish with water repellent properties is desired. Formulated specifically for use as a finish over exterior unpainted concrete patios, decks, sidewalks, driveways and tennis courts. Ideal for properly prepared vertical surfaces such as stucco, stone, brick, exposed aggregate concrete, textured concrete, split-faced block, glass reinforced concrete and other masonry surfaces.

Use on:

- Concrete Driveways
- Pool Decks and Patios
- Concrete and Cinder block
- Tennis Courts
- Sidewalks and Steps
- Tiltup construction
