

ULTRA TEX 2200

SUPER HARD TEXTURE SYSTEM

Anvil Ultra Tex 2200 Knock Down Finish

Super Hard Color-Inclusive Texture System for New Construction and Renovation

When it comes to new construction and renovation in the hospitality industry, Anvil Ultra Tex 2200 has quickly become the architect's choice for interior finishes. Offering a multitude of texture and color options, Ultra Tex 2200 is far more interesting than paint.

With an exciting array of new textured wall options in countless design choices and colors, not only is Anvil Ultra Tex less expensive than vinyl wallpaper, it provides superior breathability, resistance to mold and mildew, and is ruggedly durable, cleaning up with soap and water.

Knockdown
texture technique.

You'll find Anvil Ultra Tex 2200 in use in the most luxurious hotel suites. Its texture and dimension complement upscale interior design.

Interior Acrylic Texture Wall Finish

THE RUGGED DURABILITY OF ACRYLIC...
the Beauty and Style of Texture Finish.

Guaranteed Durability

Developed for the most demanding hospitality and commercial applications, Anvil Ultra Tex 2200 is warranted not to chip, blister, peel, crack, chalk or delaminate for at least a decade. Composed of 100% pure acrylic, this breakthrough product is colorfast, resin rich and contains no Crystalline Silica, cement or plaster compounds. Backed by a Limited 10-Year Product Warranty, Ultra Tex 2200 is designed for durability.

Unmatched Versatility

Anvil Ultra Tex 2200 combines the color diversity of paint with the texture options of plaster to deliver the most versatile wall covering available. Unlike paint and drywall texture, Ultra Tex 2200 offers solid color completely throughout the finish for added durability. Color choices for the base and texture coats range from pastel to medium, and can be custom-color matched to project specifications. A skilled contractor/applicator can achieve a variety of textured finishes. Design options are limitless with the new aggregated texture choices.

Splatter finish technique.

Economical Viability

For product life cycle and performance, Anvil Ultra Tex 2200 surpasses vinyl wall covering or paint. Easy to apply and quick drying, it's the perfect choice for time-sensitive renovation projects and new construction. As an added bonus, Ultra Tex 2200 is self-priming on new drywall, eliminating priming time and expense -- and leaving rooms serviceable the next day!

Advanced Breathability

Anvil Ultra-Tex 2200 is unlike traditional vinyl wallpaper! Its advanced, breathable attributes allow wall moisture to escape, virtually eliminating mold and mildew issues. It's backed by a Limited 10 Year Warranty against mold and mildew. And unlike vinyl wallpapers, Ultra Tex 2200 contains no harmful chemical emissions.

Enhanced Visibility

Anvil Ultra Tex 2200's unique consistency quickly and effectively hides surface imperfections, fills nail holes and bridges small cracks with little or no additional work beyond normal application. Combined with Ultra Tex's infinite array of texture and color combinations, it's the perfect solution for textural wall surfaces.

Typical example of small knockdown.

Literally millions of square feet of Ultra Tex 2200 have been installed in hotels, motels, offices, apartments, condos, restaurants, health care facilities and other high-traffic commercial buildings around the country.

With so many color and texture options, the only limit is your imagination.
